

**Coffee Revolution: From the grounds comes
the color of change**

How can we reduce the methane emissions generated by coffee grounds by transforming them into a useful?

Ramón Majé, Thomas Arango, Sandra Villegas, Oscar Cruz, Jeison Lozano

ENGAGE INVESTIGATION

+21.000 Ha coffee

REGION: PITALITO

60 coffee shops in the region

600 kg of coffee grounds waste per month.

60 kg WASTE

They release methane, a gas 25 times more polluting than CO₂

coffee grounds waste

ACT

coffee grounds

The coffee crayon project is developed in three stages: immersion (background reading and interviews), transfer (in the creation of the coffee grounds crayon) and communication in presenting the venture at an international event and through a website.
