

Project Name: Ngora Greening Campaign

Essential Question: How can we protect our environment from degradation?

Team Members: (First names and last initials only) Briget N, Mary A,
Holibamah A, Favour I, Martha A, Vivian M, Elizabeth A

Educators- Grace. N, Simon. K, Martin, O.

School/Organization Name: NGORA GIRLS SECONDARY SCHOOL

Location (City, State/Province, and Country): SOROTI CITY, TESO REGION
UGANDA

Engage Climate Action

The challenge the project is addressing is environmental degradation.

How did your team select this topic or challenge?

The team chose this topic because climate action is a big debate all over the world. People are not using the planet sustainably and if no action is taken now, future generation will terribly bear the brunt of our bad acts. Many countries are facing high temperatures, land slides, due to acts such as cutting trees without planting more, plastics are thrown everywhere affecting food production, water sources and health of the people. Carbon emissions are thrown into the atmosphere by industries without mitigation strategies. COP26 highlighted the importance of every person doing something towards reducing global warming,

Statistics found on climate Action

- Since 1970 global surface warming have risen faster than in any 50 year period.
Global Co2 emission rose highest in 2016 with the highest temperatures.
More than 1 million species are at risk of extinction by climate change
Within the next 2 decades, global temperatures are likely to rise by 1.5 degrees Celsius.
The main threats of climate change stemming from rising temperature of earth include rising sea levels, ecosystem collapse and more frequent severe weather

CLIMATE ACTION

PROBLE S

1. Lack of rain
2. Lack of shade.

SOLUTION

1. people should plants trees.
2. people should stop cut tree

Investigation Stage

- Trees cut into logs

- Trees cut for firewood

Trees cut for firewood

- Water sources affected

Water source drying

Plastic bottles and polythene bags destroying the environment

Action Stage

- Rid the environment of plastics

- Plant trees to reduce carbon emissions

mitigation efforts on climate action

Sensitize students about the mitigation efforts

- Video Campaign on climate change

video on importance of planting trees
