

EQ: How Do We Solve Hunger and Food Insecurity in our community ?

Project Name:

Big Idea: Address UN Goal #2 No hunger and Goal # Quality Education to improve community outcomes in both

Essential Question: How can we solve hunger and food insecurity?

Team Members: (Lorita W. , Bianca P. , Frederick M.)

School/Organization Name: Kingbridge Heights Community Center
Location (New York, New York , and Bronx):

Engage:

What challenge does your project address?

UN Goal #2 No Hunger

Why did your team select this topic or challenge?

I, Lorita W. attended the Edcamp: Maker Learning

How is it a real world problem or concern? The Bronx was particularly affected by Covid 19, resulting in an increase in unemployment and therefore food insecurity: our research states $\frac{1}{8}$ people.

Investigation:

We are a third through the process. We are learning about hunger and food insecurity as well as ourselves, as a staff and student body as we take on pbl, project based learning. As we incorporate a multi-discipline process where the students do the real work, developing 21st century skills; communication, collaboration, critical thinking and creating. Students will be interviewing KHCC connect personnel, NYC Bronx Health Director, as well as presenting to the electeds their findings.

Action:

Mostly students have identified the problem by researching and reading about the problem, as many as 400,000 Bronxites were deemed food insecure due to Covid. There is still much demand , as food insecurity looks different for different people.

Students have voice and choice, they will create: Blogs, Ted-ed Talk, Skit for NYC Film School Festival, present question to podcasts and, data visualizations, and curate a map so people can locate the closest pantry or resources. The peer review and mentoring has worked out well, giving the tween confidence in their work, and better work product.

A photograph of a farmers market stall. A woman in a colorful floral top is handing several green and pink Health Bucks to a vendor. The vendor, a woman with glasses and a brown top, is smiling. In the background, a man in an orange shirt and a white cap is working behind a counter with a scale. On the counter are several carrots and an eggplant. A sign in the background says "uy Farm @ gma" and "No Pesticides".

Use your Health Bucks to **buy fresh fruits and vegetables** at all NYC farmers markets!
